PROFILE

Aspiring Python backend developer with strong skills in Python, Django, RESTful APIs, and SQL. Passionate about clean code, logical problem-solving, and building scalable backend systems. Skilled in version control using Git and experienced with tools like SQL. Known for good communication, leadership qualities, and effective time management.

CERTIFICATION

- **Python Backend Developer |** TOPS Technologies May 2025

I have covered Python programming, data structures, OOP, file handling, exception handling, modules, functional programming, multithreading, and database connectivity (SQLite/MySQL). I also gained knowledge in REST API development with Django, authentication, and Git.

TECHNICAL SKILLS

- Python
- Java
- Html, Css
- Js
- PHP

PROJECTS DETAILS

- **Weather Forecasting – APIs based Weather Website.**

  API-Based Weather Site provides real-time weather information using HTML, CSS. JavaScript, PHP, and the Open Weather API. This project involved creating a user-friendlyinterface for fetching and displaying weather data based on user input.
